Nicosia, 12th OCTOBER 2021
Understanding Climate of Change

### SOCIAL INEQUALITY AND ECOLOGICAL JUSTICE

**Share of global population**

- Richest 1%
- Richest 10%
- Middle 40%
- Poorest 50%

**Share of cumulative emissions 1990–2015**

- 15%
- 52%
- 37%
- 41%

**Share of global carbon budget for 1.5°C**

- Remaining carbon budget will be depleted by 2030 without urgent action

- Used 1990–2015

- 31%
- 22%
- 25%
- 4%
• Evidence-based narrative developed on climate change impacts as one key driver for migration, highlighting the interconnection to the current development model, our economic system and our own lifestyle.

• Young people are made aware of their role and responsibilities on human-induced climate change root causes and its consequences in terms of forced displacement and irregular migration
A focused, strategic, participatory and innovative Pan-European communication campaign carried out in the whole EU and particularly in 23MS including Southern and Eastern Europe.

Youth actively involved in advocacy actions calling for a more sustainable model including climate change mitigation measures and specific protection schemes for climate migrants.
POLICY AIMS

- Reverse financial flows from those countries that have benefited or are benefiting the most from these unjust structures to those that have been disadvantaged
- Allow for more just trade and associated structures of production
- Allow people to exercise their freedom of movement
- Ensure much more equal access to productive assets
- Ensure universal access to essential services and social security
# End Climate Change # Start Climate of Change#

**POLICY AIMS**

- Guarantee human rights of workers and small producers in global value chains
- Shift the political mindset from ever growing gross domestic product (GDP) and global trade to aiming directly for wellbeing within planetary limits
- Approach trade not from the perspective of a fixation with growth but one that realises commerce’s potential to support the transformation towards a wellbeing economy
#End Climate Change# Start Climate of Change#

POLICY AIMS

• Change is political; climate change is a question of power.
• Building a counterweight - in the political sphere, in public discourse and in everyday contexts.
• Civil society, young people, activists and citizens to ally together
• Organisations that can work together in alliances, strong movements that prepare the ground for change and people who support the struggle.
